Submission of an article is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere.

Submission information
Authors are requested to submit their papers electronically by using online manuscript submission available at www.pccc.icrc.ac.ir.
Any queries regarding accepted papers, proofs or reprints should be directed to the Progress in Color, Colorants and Coatings office.
All manuscripts will be reviewed by independent reviewers. Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher.

Manuscript preparation
Manuscripts should be written in proper English. Ensure that the following items are present:

- **Format.**
  Papers should be in TWO-COLUMN format. Paper, using portrait orientation. Manuscripts should be in Word format and not more than 15 pages sizes of standard A4 paper, leaving 2.5 cm each margin and 2.5 cm top and 2.5 cm from the bottom of the page. The font for the main text should be in Times New Roman, 10 point size, Normal. The first paragraph of each section should be Normal style while, others should be prepared in Body style (no indents) and multiple-spaced at 1.2. Do not start new sections on a new page if space is available on the previous page and using justified paragraph alignment through the whole paragraphs.

- **Title.**
  Titles should be Concise, informative, and brief. Title should not be complete sentences. Write out abbreviations. The font for the title should be Times New Roman, 15 point size, bolded and aligned left on the first page of the paper.

- **Author names and affiliations.**
  Present the authors’ affiliation addresses (where the actual work was done) below the names. Provide the full postal address of each affiliation, including the country name and the e-mail address of all authors. List each author name separately; a group should not be listed as an author. Give the complete information about all authors academic titles (professor or associate professor) and, the department or laboratory for university affiliations.

- **Keywords.**
  Provide a maximum of 6 keywords. Please type in 8 point font size.

- **Abstract.**
  A concise and factual abstract consisting of one paragraph is required (90-150 words) and should be placed before the introduction section. The abstract should state briefly the scope, the principal results and major conclusions. The abstract should be informative, not descriptive. It should not serve as an introduction, nor contain references. Define all abbreviations used in the abstract and avoid including reference citations.

- **Introduction.**
  State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

- **Experimental/Materials and methods.**
  Provide sufficient detail to allow the work to be reproduced.

- **Results and Discussion.**
  This should explore the significance of the results of the work, not repeat them.
• **Conclusions.**
A short conclusions section is to be presented and should be divided into specific points.

• **Acknowledgements.**
Groups and other contributors who do not meet the authorship criteria should be appropriately acknowledged in the acknowledgments section. Place acknowledgements, before the references, in a separate section, and not as a footnote on the title page.

• **References.**
All sources cited in text must appear in the reference list at the end of the document. Number the references (numbers in square brackets) in the list in the order in which they appear in the text, not alphabetically. Use size 10 font. Examples:

Reference to a journal publication: Author’s initials, article title, journal name (*Italic*), volume (publication date), pages/citation number.

Reference to a book: Author’s initials, book title, publisher, publisher’s location, publishing date, pages.

Reference to a conference: Authors, title of paper presented, name of meeting, meeting sponsor, location of meeting, (date), pages.
1. L. Sivik, NCS - reflecting the color sense as a perceptual system, in Proceedings of the 8th congress of the international color association, AIC Color 97, Kyoto, Japan, I(1997), 50-57.

Reference to a thesis: Authors, thesis title, thesis designator (including degree), institution, institution’s location, date.

Reference to a patent: Authors, patent title, type of patent and its number, Date.

Reference to a URL address: Authors, title, URL address, Date.

Reference to a standard: Standard title, standard name, standard number, date.

• **Figure legends, tables, figures, schemes.**
All figures, graphs, tables, schemes, equations, and illustrations should generally fit to one column or place them across two columns at the top or bottom of the page. Insert them into the body of your paper. Figure captions must be placed right below the figure being described using Arial font, 9 point size with style of heading 6. However, type table captions above the table and using the same format. Multicolored figures, graphs, tables, photographs, and illustrations are acceptable and encouraged. High-resolution graphic files must always be provided separate from the main text file. Always use a minimum of 300 dpi (TIFF or JPEG). Ensure that each illustration has a caption. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used. Number each item consecutively in accordance with their appearance in the text.

• **Nomenclature and units.** Follow internationally accepted rules and conventions: use the international system of units (SI). If other quantities are mentioned, give their equivalent in SI.

• **Equations and Formulae.** Equations and other mathematics should not be formatted as pictures. Use math type or insert symbols as normal text. Complicated chemical equations, formulae, and schemes should be presented as furnished artwork. Mathematical expressions and chemical formulae should be typed with available symbols and letters. Capital, lower case, and Greek letters should be easily discernible, and identified in the margin so that ambiguities could be protected. Equations should be numbered consecutively throughout the paper with Arabic numerals in parentheses placed flush right, and should be thusly referred to in the text [such as Equation (2)].

• **Proofs**
One set of page proofs in PDF format will be sent by e-mail to the corresponding author, to be checked for typesetting/editing. No changes in, or additions to, the accepted (and subsequently edited) manuscript will be allowed at this stage. Proofreading is solely the author's responsibility. A form with queries from the copyeditor may accompany your proofs. Please answer all queries and make any corrections or additions required.

The final article will then be published online as an article on www.pcce.icrc.ac.ir
