

INSTRUCTION TO AUTHORS

Aims and Scope: The *Iranian Journal of Clinical Infectious Diseases (IJCID)* is a peer-reviewed multi-disciplinary medical publication, scheduled to appear quarterly serving as a means for scientific information exchange in international medical forum. The journal particularly welcomes contributions relevant to the biomedical experiences and clinical investigations on infectious diseases as well as analyses of factors that may modulate the incidence, course, and management of infectious diseases and pertinent medical problems.

Peer Review System of IJCID: Manuscripts are first reviewed by the editorial board to ensure their appropriateness relevant to the framework of the journal. Manuscripts are also excluded by the editors if there are major faults in the methodology of research. Peer-reviews are handled anonymously and comments are discussed in weekly editorial sessions. Reviews are then sent to the corresponding authors for proposed modifications and the new version of the manuscript would be peer-reviewed for a second time by three reviewers. Finally the editorial board will decide to accept or reject an article.

Submission: Manuscripts must be submitted in English. Authors will be asked to declare that their manuscripts are exclusively submitted to *IJCID*, have not been previously published elsewhere (except in the form of an abstract or as part of a published lecture, review or thesis), and are not under consideration by another journal. The transmittal letter should designate one author as correspondent and all other authors should personally sign the submission cover letter. Manuscripts should be prepared in accordance with the “*Uniform Requirements for Manuscripts Submission to Biomedical Journals*” proclaimed by the International Committee of Medical Journal Editors (<http://www.icmje.org>). Authors are responsible for all statements made in their work. The right is reserved to incorporate any changes deemed necessary by the editorial board to make contributions harmonize with the editorial standards of the journal. Accepted manuscripts become the property of *IJCID*. Copy Right Agreement (Available at <http://www.journals.sbm.ac.ir/ijcid>) should be completed and sent via fax or e-mail following the acceptance of the article.

One original along with two copies of the manuscript and one copy of the article on CD should be submitted to:

Masoud Mardani MD, Editor in Chief.

Iranian Journal of Clinical Infectious Diseases, Infectious Diseases and Tropical Medicine Research Centre, 7th floor, Faculty of Medicine, Shahid Beheshti University, M.C., Tabnak Avenue, Evin, Tehran, Iran.

The authors may propose three potential reviewers in the filed of the study; however, their endorsement depends on the editorial decision.

Online Submission: *IJCID* provides an online submission and peer review system that enables authors to submit their papers online and track progress. For online submission refer to the website at <http://www.journals.sbm.ac.ir/ijcid>. Once the article is accepted for submission, the manuscript should be e-mailed or saved on a CD accompanied by a matched hard copy. Manuscript should be in Microsoft Word 2000 or later format. Figures should either be produced by Microsoft Excel or the original high resolution hard copies must be sent. The entire article should be submitted as a single file. Do not insert tables in references. Write on CD the software package used and the name of the authors.

Copyright Transfer: All the articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article, as well as all translation right. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic databases, video disks, etc. without first obtaining written permission from the publisher. The use of general descriptive names, trade names, trademarks, in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

Structure of Articles: Text of the **Original Articles** should include title page, abstract, keywords, introduction, patients and methods, results, discussion, acknowledgment, conflict of interest, references, tables, figures, and legends, enumerated from the title page. The length of the text should not exceed 4500 words excluding the references. **Randomized Controlled Trials** should include patients' informed consent form and the bioethics committee approval of the

INSTRUCTION TO AUTHORS

corresponding university. **Review Articles** are solicited by the editor, but IJCID will also accept submitted reviews. The authors of review articles are invited to contact the Editorial Office before preparing a review article for IJCID. Both solicited and unsolicited review articles undergo peer-review and editorial processing as original papers. **Case Reports, Brief Reports and Photo Quizzes** should be limited to 2000 words. Case reports should include abstract, keywords, case presentation, discussion, acknowledgment, references, and 1–4 figures. Necessary documentations of the case(s) like pathology reports, laboratory test reports, and imagings should be included in the submission package. Brief reports contain less scientific data than the original articles and should not have more than one figure and/or table.

Title Page should include the complete title of the manuscript, the name of all the authors with their highest qualifications, the department or institution to which they are attached, address for correspondence with telephone numbers, e-mail, Fax number and short running title of the article, source of funding, number of figures, tables, total word count and total number of pages.

Abstract should include objective, patients and methods, results, and conclusion sections separately. Abstract fragmenting is not necessary for Case Reports and Photo Quizzes. Review Articles do not have an abstract in IJCID. The length of an abstract should not exceed 250 words.

Keywords: For indexing purposes, each submitted article should include three to five keywords chosen from the Medical Subject Headings (MeSH).

References: The authors are responsible for the accuracy of the bibliographic information. References must be numbered consecutively in order of citation in the text. Mark reference citations by superscript Arabic numbers. Personal communications and unpublished data including manuscripts submitted but not yet accepted for publication should not be used as a reference; nonetheless, they may be placed in parentheses in the text. Periodical titles should be abbreviated according to the *Index Medicus*. The References should be written in Vancouver style as per “Uniform requirements for manuscripts submitted to biomedical journals” for details see ICMJE website: www.icmje.org. List all authors when there are six or fewer. If there are seven or more list the first six followed by “*et al*” Reference should provide the following information: Author’s name with initials, full title of cited article, name of the journal in which the article appeared (in abbreviated form), Year of Publication, Journal’s Volume, Number and finally first and the last page numbers, such as:

1 Lechowicz M, Dittmer DP, Lee JY, Krown SE, Wachsmann W, Aboulafia D, et al. Molecular and clinical assessment in treatment of AIDS Kaposi sarcoma with valproic Acid. *Clin Infect Dis*. 2009;49(12):1946-9.

2 Schiebler GL, van Mierop LHS, Krovetz LJ. Diseases of the tricuspid valve. In: Moss AJ, Adams F, eds. *Heart Disease in Infants, Children, and Adolescents*. 2nd ed. Baltimore: Williams and Wilkins;1988:134 -9.

Reference from the books should have Authors name and initials, complete title of book, Name of Editors, address (city) of the publisher, first and last page numbers and finally the year of publication, such as:

3 Haroon TS. How to plan a scientific study, ‘Medical Writing’ (second edition), Jawaid SA, Jafary MH & Zuberi SJ (Eds), Pakistan Medical Journalists Association, Karachi, Pakistan. pp 1-13, 1993.

Tables: Enumerate tables with Arabic numerals. They should be self-explanatory, clearly arranged, and supplemental to the text. Tables should provide easier understanding and not duplicate information already included in the text or figures.

Figures should be utilized only if they augment comprehension of the text. Drawings and graphs should be professionally prepared in deep-black and submitted as glossy, black-and-white clean photostats. Professionally designed computer-generated graphs (grayscale or color) with a minimum of 300 dpi laser printer output are also acceptable. Each figure should have a label on the back, listing the figure number, title of manuscript, first author, and an arrow indicating the top. Illustrations should be numbered as cited in the sequential order in the text, and each should have a legend on a separate sheet.

INSTRUCTION TO AUTHORS

Conflict of Interest: This is designed to identify any potential financial conflicts of interest before the review process begins. The following would generally be regarded as potential conflicts of interest:

1. Direct financial payment to an author for the research or manuscript production by the sponsor of a product or service evaluated in an article.
2. Ownership of shares by an author in the company sponsoring a product service evaluated in an article (or in a company sponsoring a competing product).
3. Personal consultancies with companies or other organizations with a financial interest in the promotion of particular health care products and services.

Conflict of interests should be declared with regard to the specific paper under consideration. Any declaration will be considered more carefully in the case of papers involving empirical evaluation of products and services. For the majority of papers, which are of a general theoretical or applied nature, conflict of interest is unlikely to be an issue.

Ethics of Publication: The IJCID's policy regarding suspected scientific misconduct including plagiarism, fabricated data, falsification, and redundancy is based on the guidelines on good publication practice of the "Committee on Publication Ethics (COPE)" available at: <http://www.publicationethics.org.uk>.

All authors will be supplied by reprints per request. Meanwhile, the editorial office will warmly welcome comments in order to promote their activity.
