Journal of Food Quality and Hazards Control
Website: http://jfqhc.ssu.ac.ir

Instructions for Authors

Journal of Food Quality and Hazards Control (JFQHC) is an international quarterly journal that publishes articles involved in food quality, food hygiene, food safety, food control and food security. The journal is open access publication of Shahid Sadoughi University of Medical Sciences and Health Services, Yazd, Iran.

Please send the manuscript along with a cover letter to the editor in chief via email attachments jfqhc@ssu.ac.ir (alternative email: jfqhc.ssu@gmail.com) or through online submission at journal website. Cover letter must be attached indicating the manuscripts have not been previously published or submitted for publication in other journals. Also, full name, affiliation, academic degree, postal address, telephone, fax numbers and email should be indicated in the cover letter.

Also, please present three expert referees about filed study of the manuscript along with their names, affiliation, academic degree, postal addresses, telephone number and emails. Referees should not be from the same institution or University.

Scopes:
- Food quality assurance and improvement
- Environmental health in food industry
- Food packaging
- Food preservation
- Food additives
- Food spoilage
- Food control, hygiene and safety
- Epidemiology of food borne diseases
- Food toxicology
- Food bacteriology
- Food parasitology
- Food virology
- Food mycology
- Food chemistry and biochemistry
- Food biotechnology
- Novel methods for detection of food hazards
- Molecular identification of pathogens in food
- Food hygiene training
- Drinking water safety
- Food security
- Nutritional and sensorial quality of food
- Functional food

Language and style
Contributions should be in either American or British English language, but not a mixture of these. Nonnative English speakers may be advised to seek professional help with the language. All materials should be typed double line spacing numbered page using Times New Roman font (size 12). Abbreviations should be standardized and used just in necessary cases, after complete explanations in the first usage.

Types of acceptable articles
A manuscript can be classified under one of the following categories:
- Original article
- Review article
- Short communication
- Letter to the editor
- Case report
- Editorial
- Book review
Preparation of manuscript

Original article

It should not exceed 7000 words and they should have the following format:

Title page: Title page of the manuscript should include the title of the manuscript; authors' names; name of the institution/university where the work was done; running title (short form of the main title presented at the top of pages); and complete mailing address, telephone/Fax numbers, and email address of the corresponding author. This page should be in a separate page with no number.

Abstract: Abstract should be structured providing introduction, materials and methods, results and, conclusion altogether should be in the range of 200-250 words. The abbreviations should not preferably be mentioned in the abstract.

Keywords: Keywords are used for indexing purpose. Each manuscript should provide three to five keywords according to the Medical Subject Headings (MESH) [http://www.nlm.nih.gov/mesh/MBrowser.html].

Introduction: Introduction should provide a background and specifies the research objective of the study or observation. This section must summarize the purpose and the rationale for the study. It should neither review the subject extensively nor should it have data or conclusions of the study.

Materials and methods: Materials and methods must indicate clearly the steps taken to acquire the information. It should be detailed. Repeating the details of standard techniques is best avoided. The software used for statistical analysis and description of the actual method should be mentioned. It is recommended that this section have some subtitles. The subtitles must be inserted as italic form.

Results: Results should be presented in chronological sequence in the text, table and figure. Organize the results according to their importance they should result from your own study. Table and illustrations have to be cited in order they appear in the text using Arabic numerals.

Discussion: Discussion should emphasize the new and important aspects of the study and the conclusion that follow from them. Possible explanations for these findings should be mentioned.

Conclusion: In this section, overall conclusion of the author(s) from the research, the limitation of the work and the implications of the finding for future research should be noted.

Conflicts of interest: Authors must declare any sources of funding and potential conflicting interest, such as receiving funds or fees by, or holding stocks and shares in, an organization that may profit or lose through publication of the manuscript.

Acknowledgments: Acknowledgments should be mentioned for any technical help, general, financial, and material support or contributions that need to be acknowledged.

References: This section should be noted by Harvard citation style indicating as follow.

A) Citation in text: Please ensure that every reference cited in the text is also present in the reference list (and vice versa). All citations in the text should refer to:
1. Single author: the author's name and the year of publication; (e.g.: Smith, 2009)
2. Two authors: both authors' names and the year of publication; (e.g.: Jay and Reid, 2007)
3. Three or more authors: first author's name followed by ‘et al.’ and the year of publication. (e.g.: Ferguson et al., 2013)

Citations may be made directly (or parenthetically). Groups of references should be listed first alphabetically, then chronologically.

B) List: References should be arranged alphabetically by authors' names and should be as full as possible, listing all authors, the full title of articles and journals, publisher and year. Note that journal full names must be italic. Examples of reference:

Figure: Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used. Figures should be presented only if they improve the manuscript.

Tables: Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the manuscript. Tables should be simple and not duplicate data in the text of the manuscript.

Abbreviations: Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the manuscript. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the manuscript.

Review article

Review articles should be prepared according to one of the following styles:

- Systematic reviews: This kind of manuscripts should be in form of meta-analysis, meta synthesis or without statistical analysis. These manuscripts contain original articles’ parts. They should contain 2500-7000 words.
- Non systematic reviews: This kind of manuscripts should be written by experts who have at least one published article in the related field in references. Different parts of such articles include abstract, introduction, discussion and conclusion. They should contain at least 25 references and the range of 3000-10000 words.
Short communication
It can be in form of research article, systematic review or ongoing research which reports its interesting findings. The parts in this type of articles are like those of original one but they are smaller and prepared in maximum 2500 words.

Letter to the editor
It should be about criticism of previous articles, criticism or review over books, analysis of a related topic with food quality and control. These manuscripts need no structure.

Case Report
This kind of manuscript should include abstract, keywords, introduction, case report, discussion, conclusion, conflicts of interest, acknowledgment, and references.

Editorial
This kind of manuscript has no special format. But the total words number should be at maximum 2000 and the references not exceeding more than 10.

Book review
In this type of manuscript, a new published internationally and valuable book regarding to the scopes of the journal, is introduced in maximum 1000 words.

Page charges
There is no page charge for publication in the JFQHC.

Copyright
The accepted manuscript of JFQHC will be protected under international copyrights. This Journal is for your personal noncommercial use. You may not modify copy, distribute, transmit, display, or publish any materials contained on the journal without the prior written permission of it or the appropriate copyright owner.

Review process
The submitted manuscripts will be assessed from editorial points of view, at first. Should the manuscript meet the basic editorial requirements; it will enter the peer-review process. The manuscript will then be sent at least to one in-office and two out of office referees for review. The corresponding author will then be informed to the referee’s remark to accept, reject or require modification.

Revision
Manuscripts may be returned to authors for modification of the scientific content and/or for language corrections. Revised manuscript and a letter listing point-for-point response to the reviewers must be submitted to the Editor and must be accompanied by a copy of the original version. Suggestion by the Editor about resubmission does not imply that a revised version will necessarily be accepted. If a manuscript that is returned to the authors for modification is not resubmitted within two months it will be regarded as having been withdrawn and any revised version received subsequently will be treated as a new manuscript and the date of receipt will be altered accordingly. Authors who resubmit a manuscript that has previously been rejected must provide the original manuscript and a letter explaining in detail how the manuscript has been modified. Accepted manuscripts become the property of JFQHC.

Proofs
A computer printout will be sent to the corresponding author to be checked for only typographical errors and other essential small changes before publication in order to avoid any mistakes. Major alternations to the text cannot be accepted at this stage. Proofs must be returned to the Editor within 7 days of receipt.

Responsibilities of authors
The authors are responsible for accuracy of all statements and data contained in the manuscript, accuracy of all references information, and for obtaining and submitting permission from the author and publisher of any previously published material included in the submitted manuscript. The corresponding author will receive an edited manuscript for “final author approval”.

Ethical guidelines
Ethical considerations in accordance with the ethical standards of the responsible committee on human experimentation must be addressed in the materials and methods section, if necessary. It is the responsibility of the authors/contributors to obtain permissions for reproducing any copyrighted material. Evidence for approval by a local Ethics Committee (for both human as well as animal studies) must be supplied by the authors on demand. The journal will not consider any manuscript which is ethically unacceptable. A copy of the permission obtained must accompany the manuscript. Copies of any and all published articles or other manuscripts in preparation or submitted elsewhere that are related to the manuscript must also accompany the manuscript.
